ENHANCED CUSTOM CD, DVD & BD PRINTING

ImageAligner is an optional add-on to the Xpress family of CD/DVD/BD production systems. ImageAligner makes adding custom printed text to your discs a breeze. With this feature installed you can over-print PRN or PDF graphics or text on pre-printed discs.

HOW IT WORKS

To print on a pre-printed disc, ImageAligner is first "trained" to recognize the image of that disc. The camera mounted over the printer takes a snapshot of the disc to be imprinted with the text. This image appears on-screen along with a control to rotate the image to its proper orientation. The ImageAligner software rotates the text to be printed on the disc to exactly match the orientation of the disc in the printer. The result is great looking printed discs every time.

QUICK AND ACCURATE

There are no moving parts in ImageAligner. Unlike other systems, there is no need for "calibration bars" or other special alignment marks to be printed on your discs. Rotation alignment is accurate to ½ degree. The entire alignment process only takes a few seconds.

WHAT IS A PRE-PRINTED DISC?

Pre-printed graphics may include text, photos or illustrations that are silk-screened (or printed by other methods) onto a disc. Discs with preprinted graphics are ready to be imprinted with custom text by ImageAligner, saving time and cost.

WARRANTY, SERVICE AND TECHNICAL SUPPORT

All ImageAligner hardware is warranted for one-year. Unaltered, defective hardware will be repaired or replaced. Our on-line help desk has instant access to the complete history of your particular Microtech system and support needs. Phone or email Microtech's tech support for answers to all of your technical questions.

Contact Microtech Sales for more information about on-site service, installation, training, replacement and extended warranties.
